Dear Hiring Manager,

I am writing to express my interest in the position at your company. As a Staff Engineer with over 8 years of experience building and scaling digital systems, I bring comprehensive expertise in cloud architecture, platform engineering, and technical leadership - honed in fast-paced startup environments where adaptability and rapid execution are essential.

In my current role at DrAnsay AU-Schein GmbH, I am responsible for platform engineering and cloud architecture for a telemedicine platform connecting patients with licensed physicians for online consultations, prescriptions, and digital healthcare services — serving 3M+ patients across Germany. Previously serving as CTO, I transitioned to a hands-on engineering role to stay closer to technical implementation.

Throughout my tenure, I have delivered 25+ projects end-to-end - from initial concept to production. I took the platform from zero to one, building core systems from scratch that now serve over 2 million users. My contributions directly enabled scaling annual revenue from ~EUR 200,000 to EUR 20 million.

I thrive in high-paced, dynamic environments where wearing multiple hats is the norm. From architecting core infrastructure to integrating critical business systems, I have consistently delivered solutions that directly enabled business growth and operational scalability.

Key accomplishments include:

- Leading infrastructure transformation from Cloud Functions to managed APIs on Kubernetes (GKE), improving scalability and operational efficiency

- Implementing GitOps workflows and CI/CD pipelines enabling rapid, reliable deployments

- Setting up API management with Gravitee for developer experience, governance, and external partner integrations

- Architecting microservices infrastructure on GCP that scaled with significant business growth

- Integrating payment systems (PayPal, Adyen) and logistics APIs (Deutsche Post) that enabled new revenue streams

My technical profile includes GCP, Kubernetes, GitOps, Gravitee, TypeScript, Next.js, NestJS, Pulumi, and modern CI/CD practices. I am comfortable working in agile teams, making quick decisions under uncertainty, and solving complex technical challenges in resource-constrained environments.

I am excited about the opportunity to bring my startup experience and proven track record of driving growth to your team. I look forward to discussing how I can contribute to your success.

Best regards,

Pranav Gautam
